Digitizing Hoops. Amplifying Culture.

Built on Polygon

FOUNDER STORY

Growing up in the early ICO era, Jared Blair witnessed both the upside and collapse of digital finance — shaping his belief that technology should serve real communities.

Through basketball, he built a global network of players and creators, but it was a moment watching a talented player in Africa — playing on dirt courts with limited resources yet full of passion — that sparked the idea.

WHAT IF PLAYERS COULD SUPPORT PLAYERS WORLDWIDE?

WHAT IF EVERY BASKETBALL JOURNEY COULD BE CAPTURED, REMEMBERED, AND SHARED?

HoopsCentral is the answer — a platform that digitizes real-life basketball and connects a global community through participation.

THE PROBLEM

- Basketball creators generate attention but do not own their value
- Platforms capture the majority of economic upside
- Global talent lacks visibility and opportunity
- No unified participation economy for basketball

THE SOLUTION

A decentralized basketball participation platform where players, creators, and fans interact through competition, content, and rewards.

VVF — VIDEO VERIFIED FEATS

The core product mechanic. Players film themselves completing basketball challenges — dribbling combos, shooting accuracy — and submit video proof. Each submission is verified, scored, and recorded on-chain.

CHALLENGES

Virtual skill challenges tied to VVF

REPUTATION

Performance-based reputation system

TIPPING

Creator tipping & rewards

DISCOVERY

Global basketball discovery

HC MARKETPLACE

Player Collectibles, badges, jerseys & more

PRODUCT EXPERIENCE

- → Upload basketball content
- → Participate in VVF challenges
- → Earn through tips and rewards
- → Build reputation based on performance
- → Shop the HC Marketplace
- → Engage with a global basketball community

MARKET OPPORTUNITY

700M+
Basketball players worldwide

8M+
NBA 2K players

$480B+
Creator economy overlap

HoopsCentral sits at the intersection of:

- Global sports communities
- Creator monetization
- Digital participation platforms

TOKEN & ECONOMIC MODEL

STABLECOIN LAYER

→ Creator tipping

→ Challenge rewards

→ Participation incentives

FUTURE ECOSYSTEM TOKEN

→ Governance

→ Staking

→ Creator economy incentives

Simple, scalable, user-first design.

WHY POLYGON

- Low transaction costs enable global participation
- Scalable infrastructure for creator rewards and tipping
- Strong ecosystem support for consumer applications
- Access to millions of existing Web3 users

HoopsCentral brings a global sports community onto Polygon.

ROADMAP

PHASE 1

- Web app launch (June)
- Creator onboarding

PHASE 2

- iOS + Android apps
- Full platform rollout

PHASE 3

- Brand onboarding
- Sponsored competitions

PHASE 4

- HoopsCentral Houses
- HoopsCentral AI

VISION

Unifying the global basketball ecosystem into a connected digital fabric.

- Every player documents their basketball journey
- Amateur careers matter as much as professional ones
- Players are characterized through performance and story
- The global basketball community becomes tighter and more connected

The basketball becomes a symbol of the world — representing a connected global community through the game.

Bringing the entire basketball world on-chain.
